

SWPanel — Brand boilerplate

Brand: SWPanel · Hosting Control Panel (all-in-one)

Owner: DeepThink Software SLU

Web: swpanel.com · **Press / brand:** brand@swpanel.com

Short (1 line)

SWPanel is the all-in-one hosting control panel that unifies Hosting, Cloud and web development in a single place.

Medium (≈40 words)

SWPanel is an all-in-one hosting control panel by DeepThink Software SLU. It brings Hosting, Cloud and web development management into one interface so professionals, agencies and resellers can migrate, manage and scale their infrastructure without friction. One panel, full control.

Long (≈70 words)

SWPanel is an all-in-one hosting control panel owned by DeepThink Software SLU. The promise is simple: a single place to migrate, manage and scale all your hosting, cloud and web development. With a token-based architecture for white-label, managed security, DNS, SSL, backups and monitoring, SWPanel gives professionals the clarity to work better and the freedom to grow without limits. Available in seven languages.
