03

Conclusions and corrections

What needs to be corrected and how to do it.

Verification of swpanel.com generated by SWPanel

Proposed corrections and improvements

Here are the errors and warnings from the verification and how to fix each one. Each one is in its own tab, so you can handle them separately; the order is the verification order, not the order of severity. Fix them all so that the Web Hosting of swpanel.com works correctly.

• 22 correct | • 2 to review | • 0 with problem

Detail of what we have found

1. The domain has a published DMARC record

To review

Group	Domain and DNS
Service	Web Hosting · swpanel.com
Result	To review

What was found and how to fix it. No DMARC record was found for **swpanel.com**.

Solution for this case:

• Add a TXT record at **_dmarc.swpanel.com** to the DNS zone, for example: v=DMARC1; p=none; rua=mailto:dmarc@swpanel.com

2. The reputation of the mail server IP is good

To review

Group	Email delivery and reputation
Service	Web Hosting · swpanel.com
Result	To review

What was found and how to fix it. The reputation of IP **198.51.100.40** is neutral: there are no blocks, but not enough history either.

Solution for this case:

• Keep SPF, DKIM and DMARC correct and avoid bulk sending from new accounts.
