Verification of swpanel.com generated by SWPanel

03

Conclusions and corrections

What needs to be corrected and how to do it.

Verification of swpanel.com generated by SWPanel

Proposed corrections and improvements

Here are the errors and warnings from the verification and how to fix each one. Each one is in its own tab, so you can handle them separately; the order is the verification order, not the order of severity. Fix them all so that the Web Hosting of swpanel.com works correctly.

• 25 correct • 2 to review • 1 with problem

Detail of what we have found

1. Checks that there is no .htaccess file in the Hosting

To review

Group	Web and SSL
Service	Web Hosting · swpanel.com
Result	To review

What was found and how to fix it. A ".htaccess" file has been found. You should check its contents.

2. An email can be sent via SMTP with the WordPress user

With problem

Group	Service status
Service	Web Hosting · swpanel.com
Result	With problem

What was found and how to fix it. The test email could not be sent from **WordPress**.

Solution for this case:

• Check that the SMTP server settings entered in the CMS are correct.

• Check that the username and password of the sending account are up to date.

Verification of swpanel.com generated by SWPanel

Proposed corrections and improvements

3. Checks that there are no cPanel paths in the Hosting files

To review

Group	Web and SSL
Service	Web Hosting · swpanel.com
Result	To review

What was found and how to fix it. Typical cPanel paths were found in files. They may come from a migration.

Solution for this case:

• Review the file **/var/www/swpanel.com/datos/web/wp-config-old.php** and replace /home/XXXXX/public_html with /var/www/swpanel.com/datos/web.
